

Press Release

Closure in the area of Kasseler Straße and Niddastrasse From Monday, November 18, full closure with dead end in Niddastrasse

From Monday, 18.11.2024, the Niddastrasse / Kasseler Straße intersection will be fully closed. The reason for this is the road construction work taking place and the associated installation of the cables for the new traffic light system that will cross Nidda-Strasse at approximately the level of the Dorint Hotel.

In the course of this work, the sidewalks in this area will also be newly constructed and equipped with barrier-free crossing points. Niddastrasse in this area will be a dead end during this period.

Coming from Parkstrasse, Kasseler Strasse can be accessed via the Niddastrasse/Gederner Strasse/Kasseler Strasse junction. The Vilco and the Dorint Hotel can also only be accessed via Parkstraße and the northern Niddastrasse (coming from the Festspielkreisel).

An emergency route will be set up for pedestrians on the Kasseler Straße carriageway. The traffic routing for road traffic on Kasseler Straße will remain the same.

Bus 30, which travels through Parkstraße, will take a detour and will not serve the “Kasseler Straße”, “Altes Rathaus” and “Kurhaus” stops in the direction of Hainer Weg (Frankfurt) during this time.

It is planned that the work and thus the closure will end before Christmas.
